Login & sign-up ALL ROLES

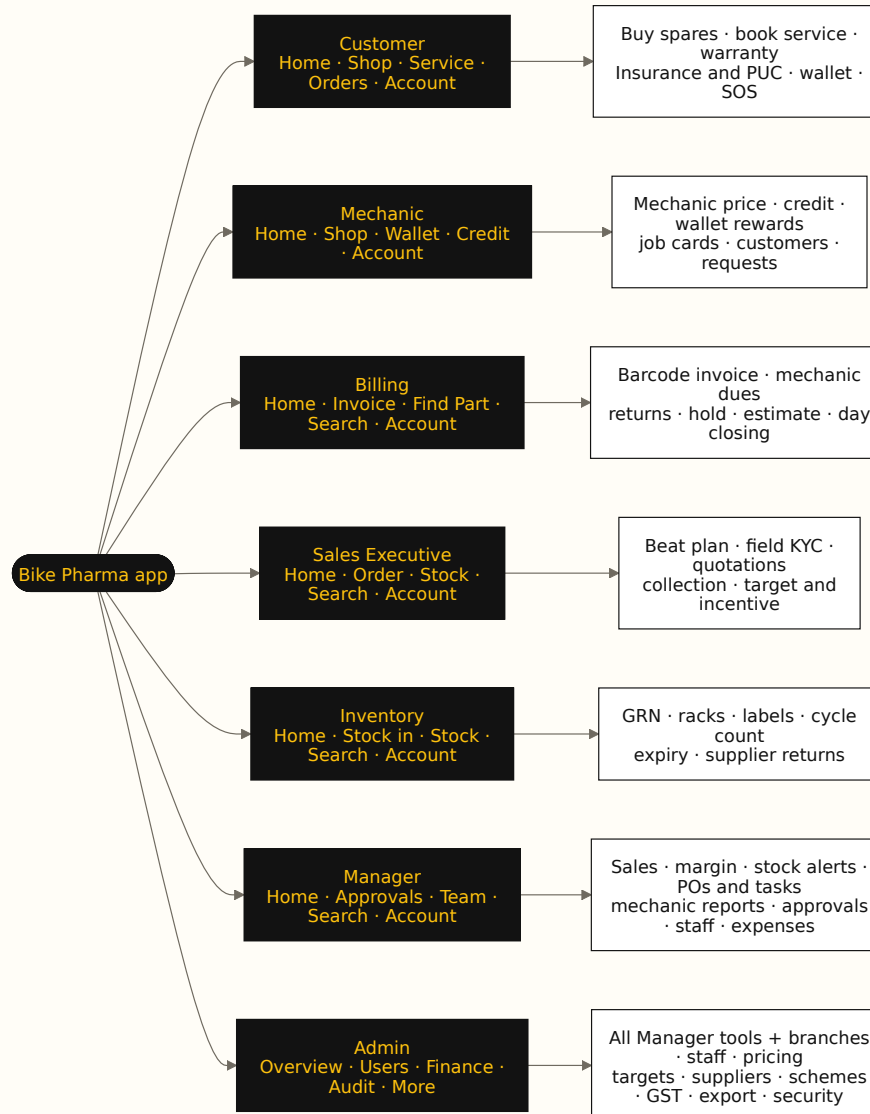

One login screen for everyone. Only customers and mechanics can sign up; staff logins are created by Admin.

Role map

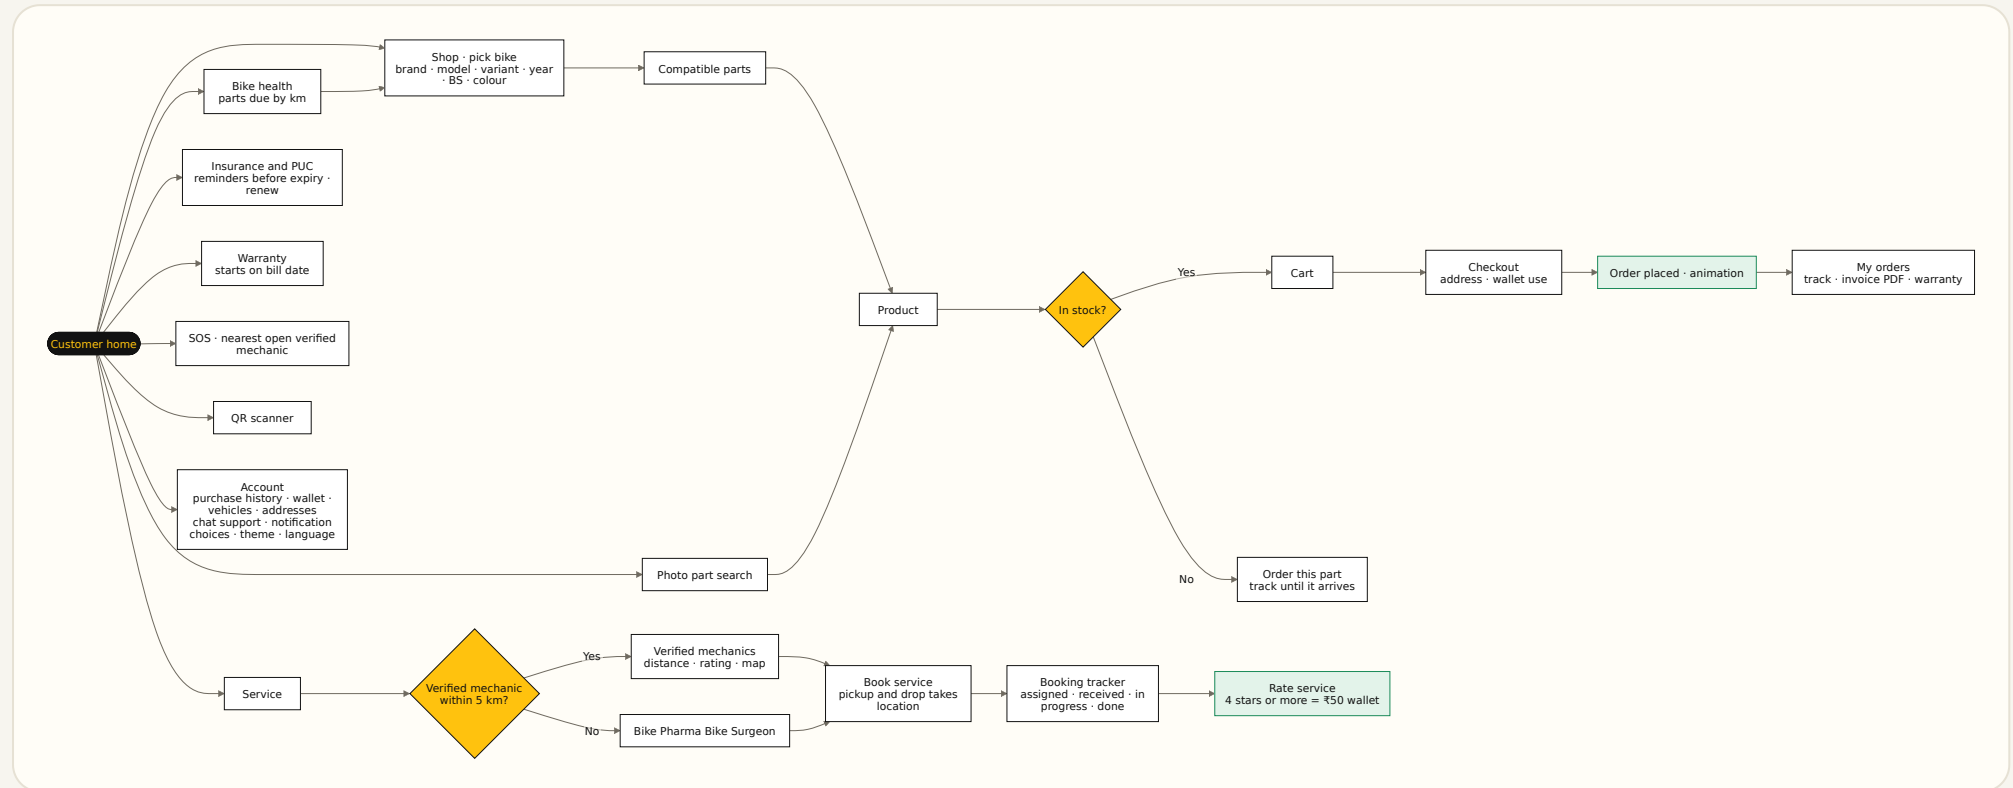

WHO SEES WHAT

Each role opens on its own home screen and bottom navigation. Admin gets everything the Manager has, grouped in sections.

Customer 8951860708

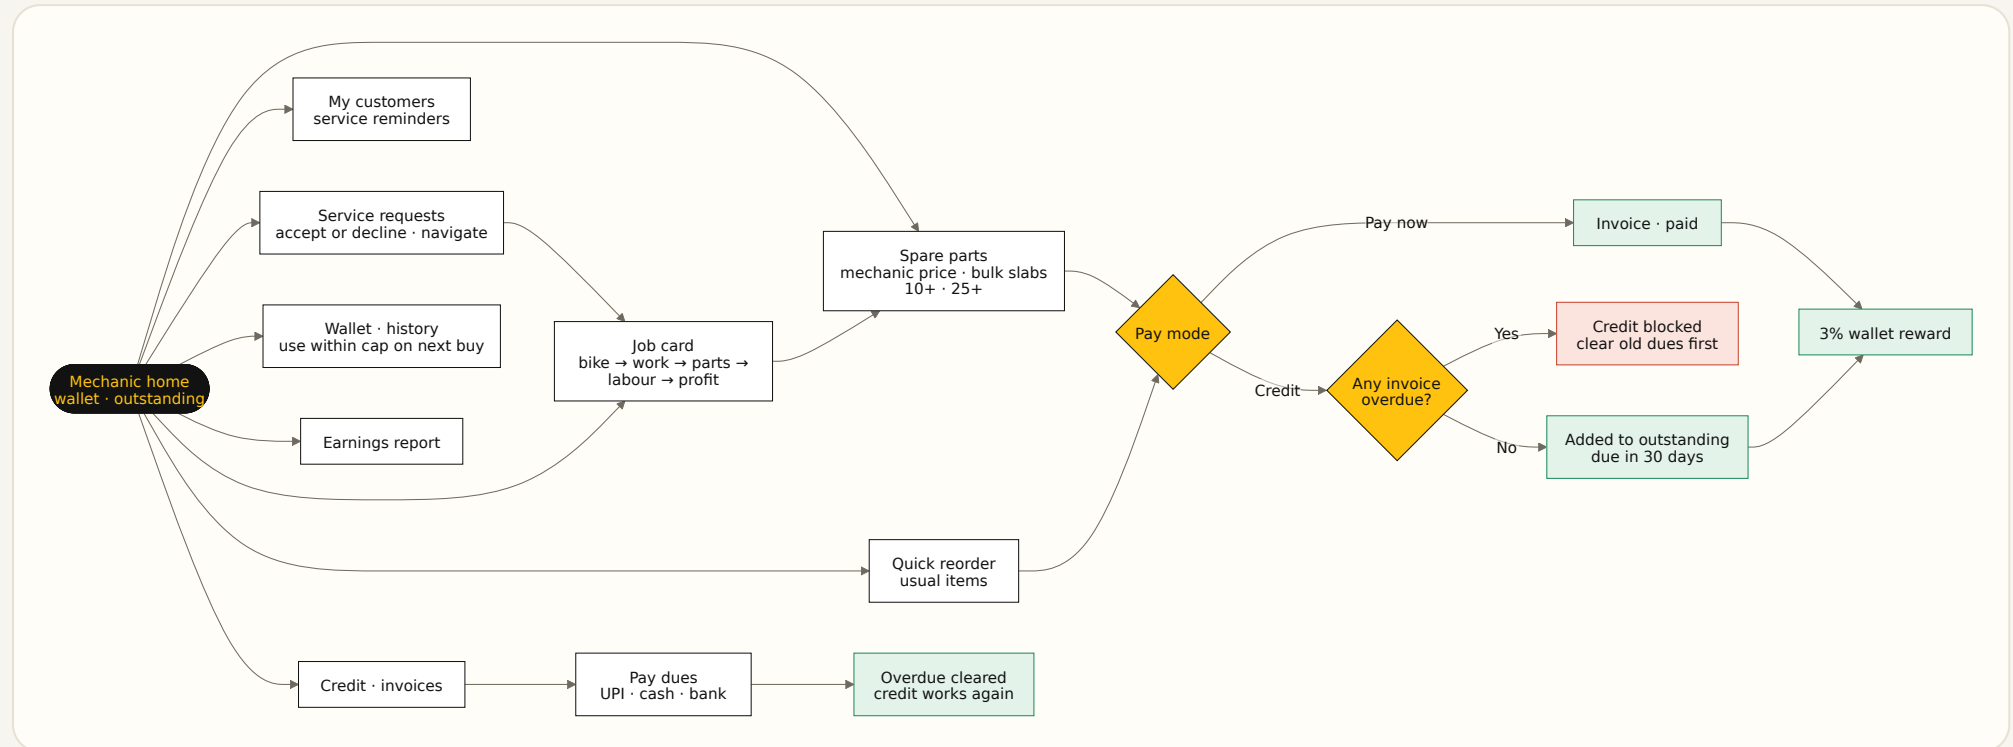

Buying parts that fit their bike, booking a service with a verified mechanic, and keeping warranty, insurance and PUC in one place.

Mechanic

9008948080

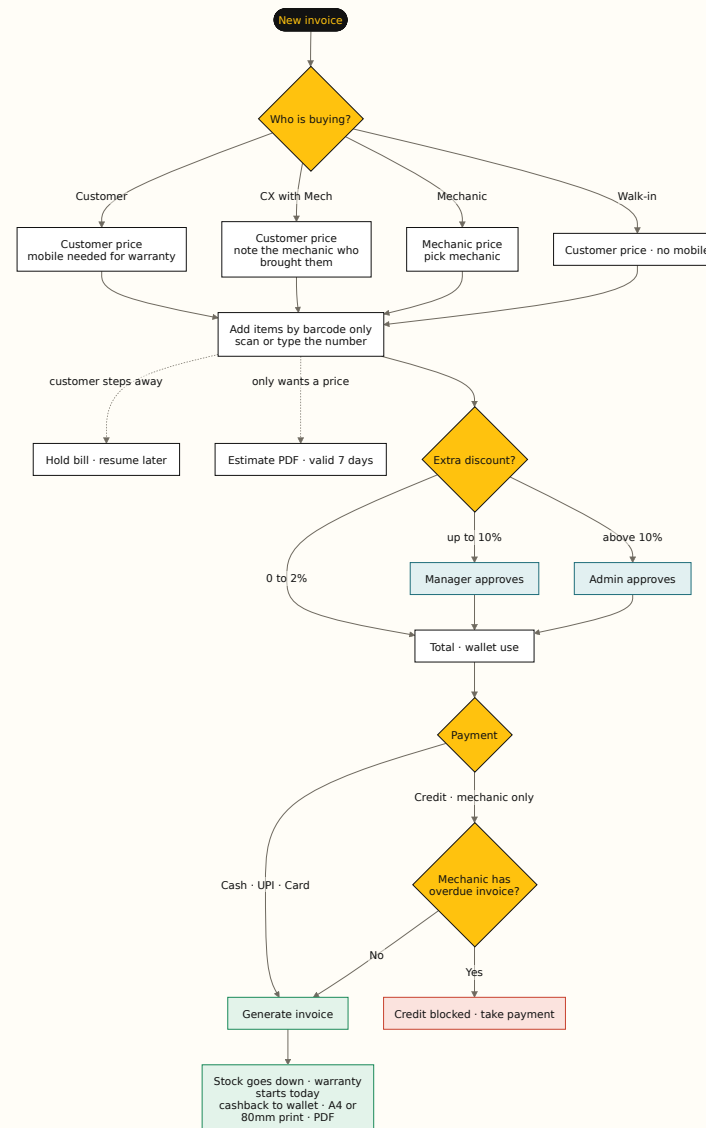

Mechanics buy at mechanic price, on credit or pay-now. Wallet (rewards) and credit (what they owe) are kept separate.

Billing · making an invoice

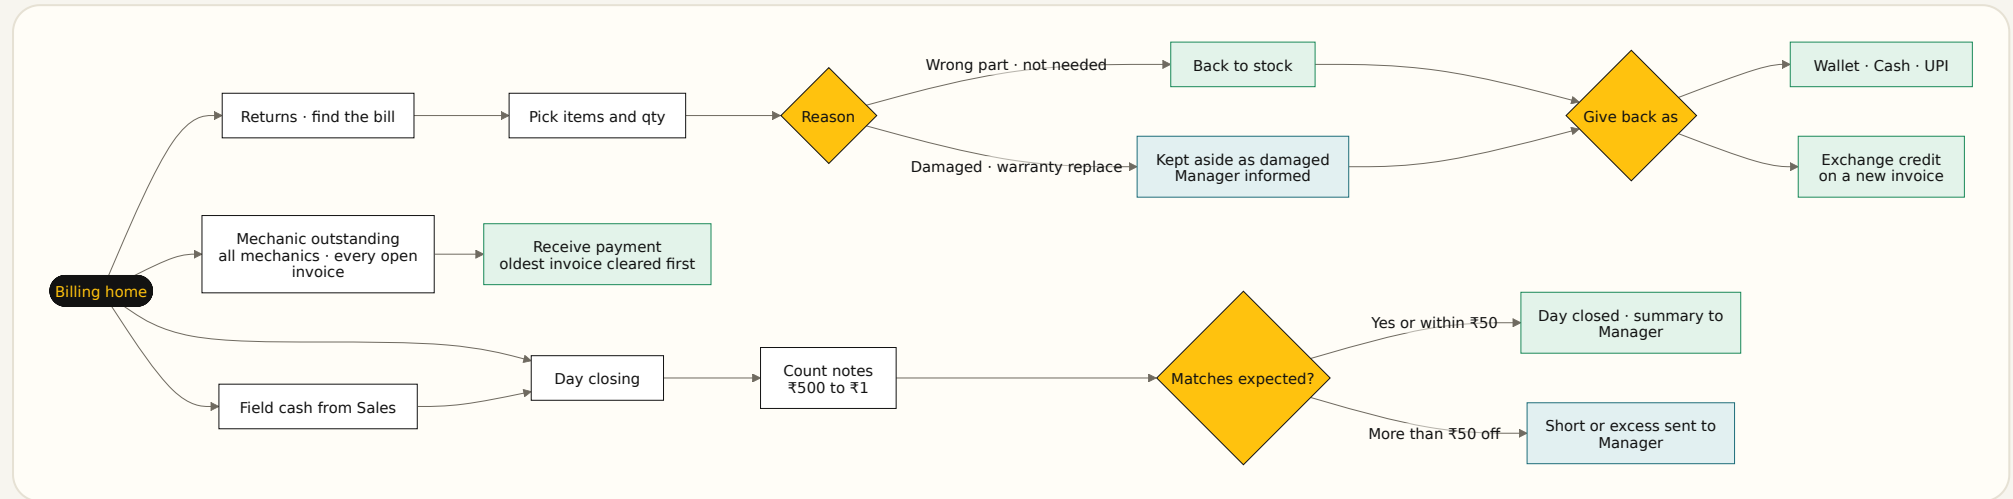

SAMKHAZI25@GMAIL.COM

Nothing leaves the counter without a bill. Items go on the bill by barcode only.

Billing · returns, dues & day closing COUNTER

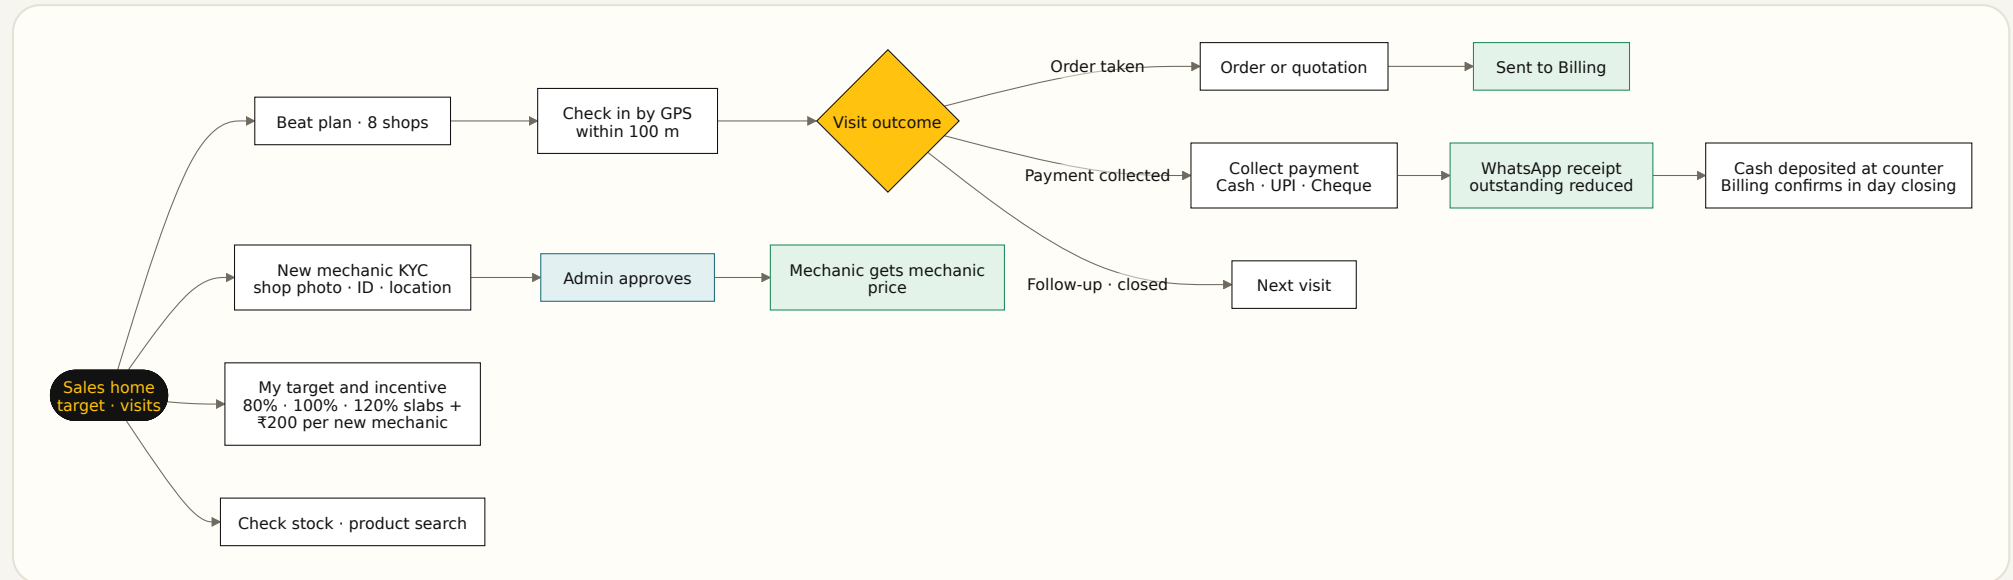

Payments from mechanics are received only from Mechanic outstanding. The day ends with a cash count.

Sales Executive

SAMKHAZI26@GMAIL.COM

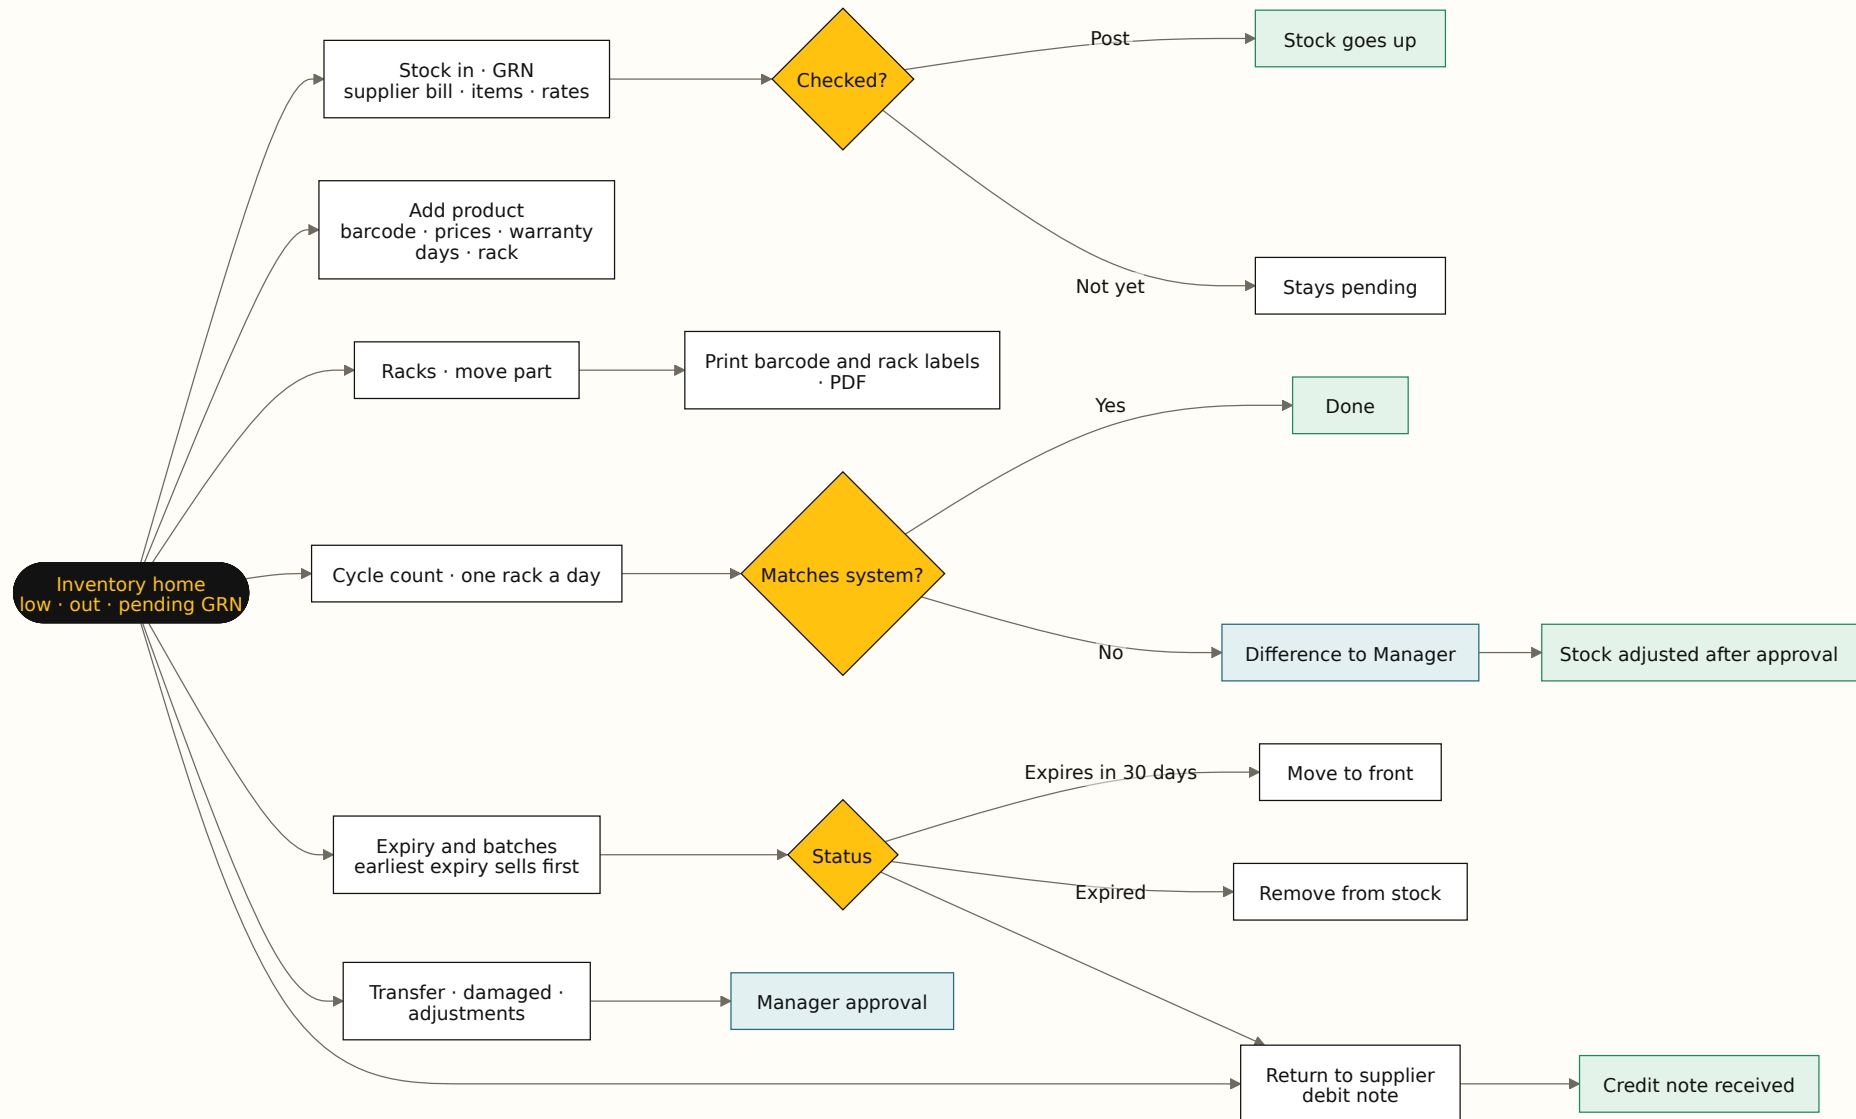

Field work: daily beat, new mechanic KYC, orders and quotations, and collecting payments.

Inventory

SAMKHAZI28@GMAIL.COM

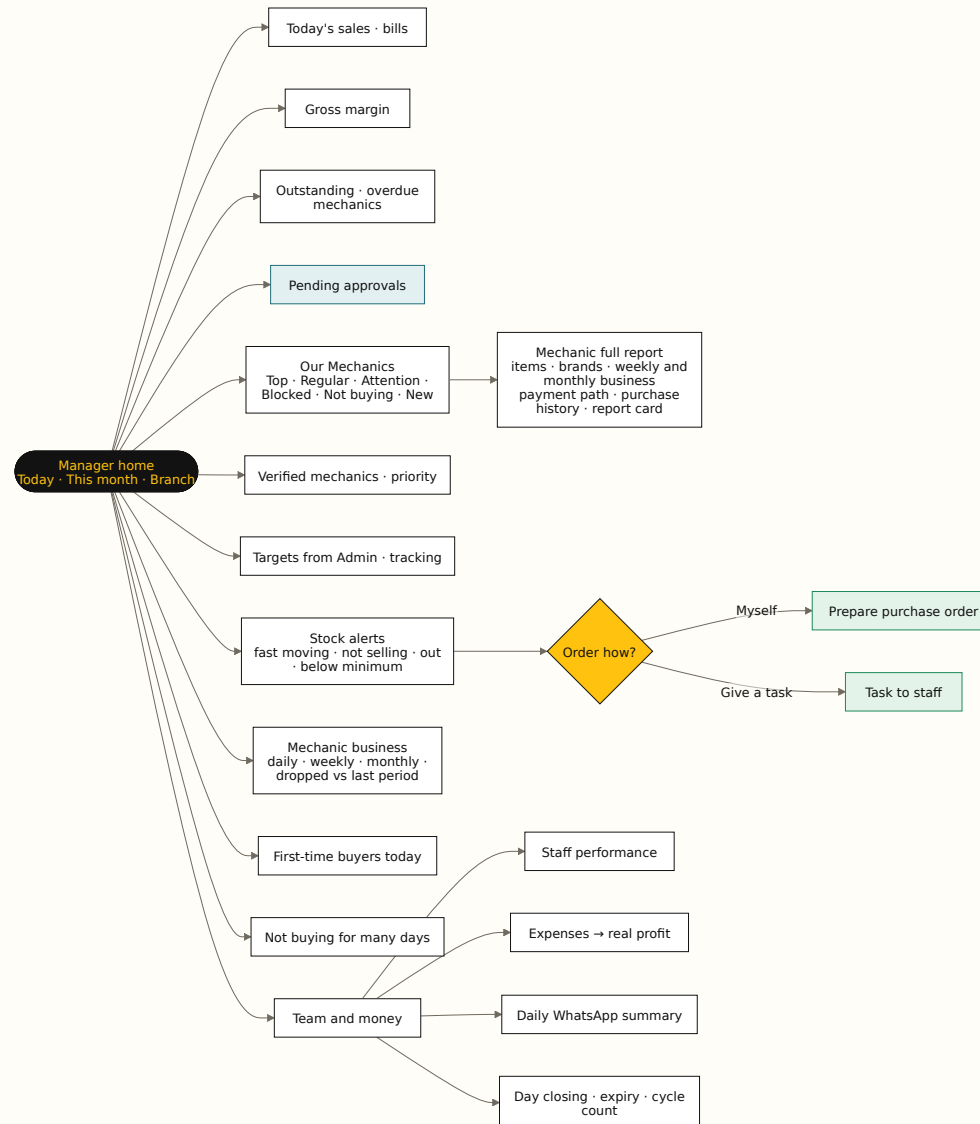

Stock goes up only when a GRN is posted. Any stock change that isn't a sale or GRN needs Manager approval.

Manager

SAMKHAZI27@GMAIL.COM

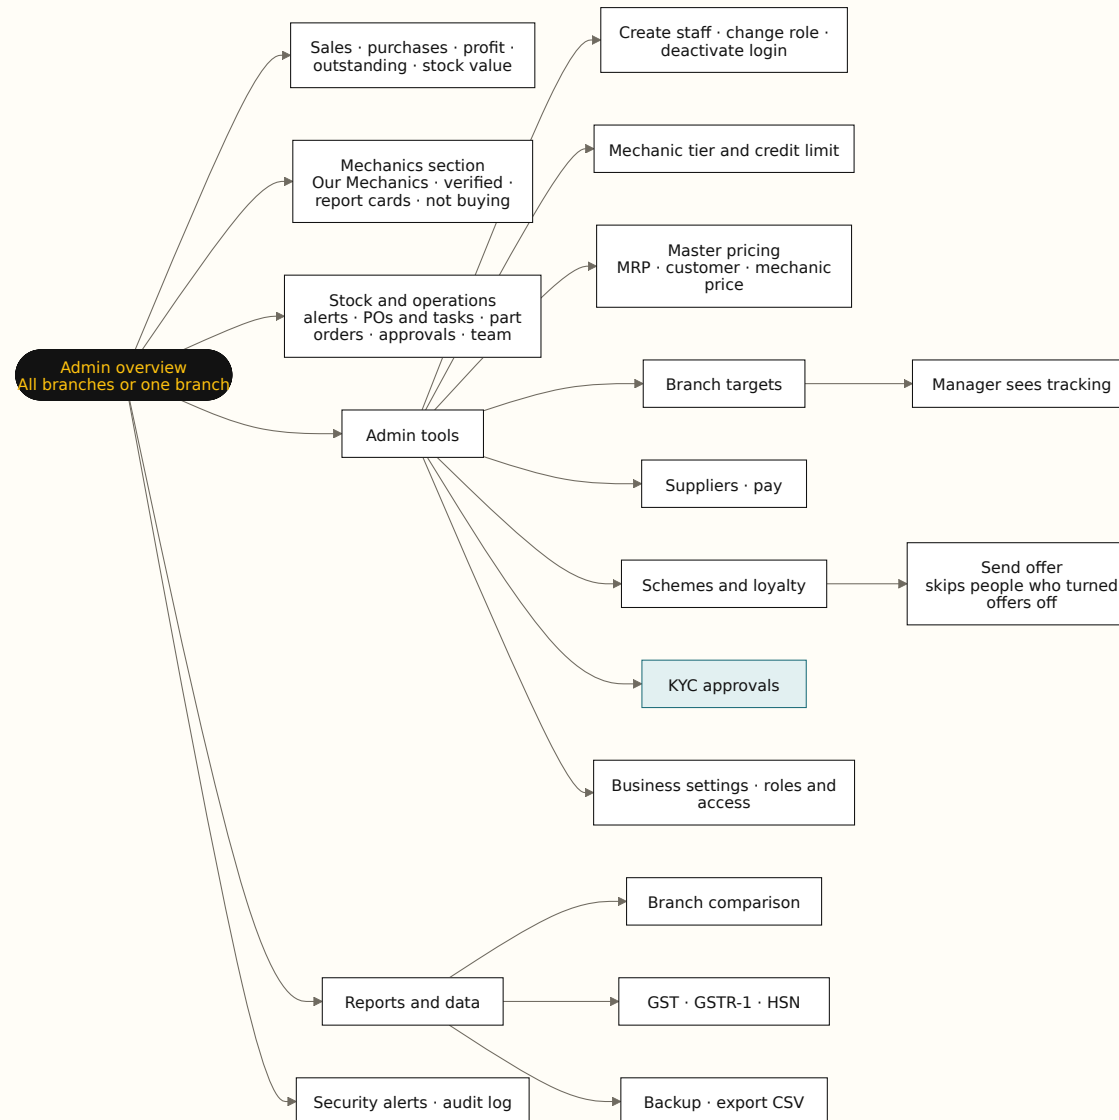

Every home tile opens its own detail. The Manager watches sales, stock and mechanics, approves within limits, and tracks the Admin's targets.

Admin

BOLTECH25@GMAIL.COM

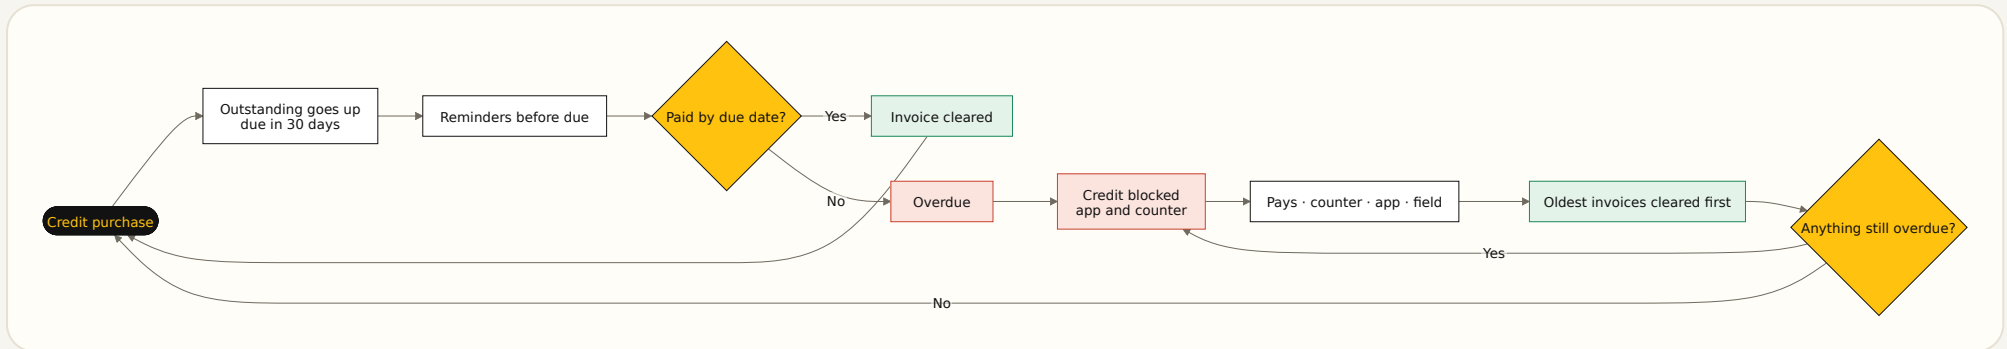

Admin sees all branches and every Manager option, grouped by section, plus control over staff, pricing and data.

Credit cycle

MECHANICS

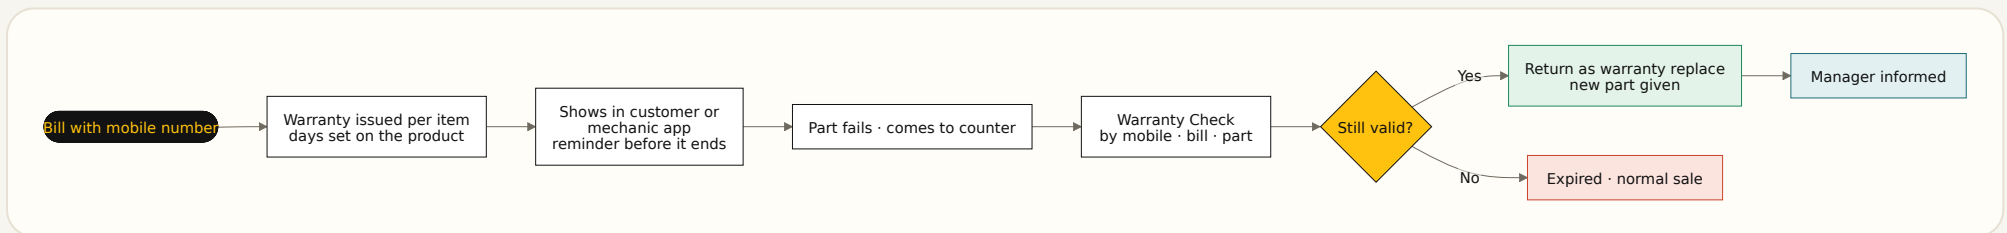

Credit stops the moment any invoice is overdue, both in the mechanic app and at the counter, and restarts when it is paid.

Warranty

CUSTOMERS & MECHANICS

Warranty days are set per product and start on the bill date.

Part order

OUT OF STOCK

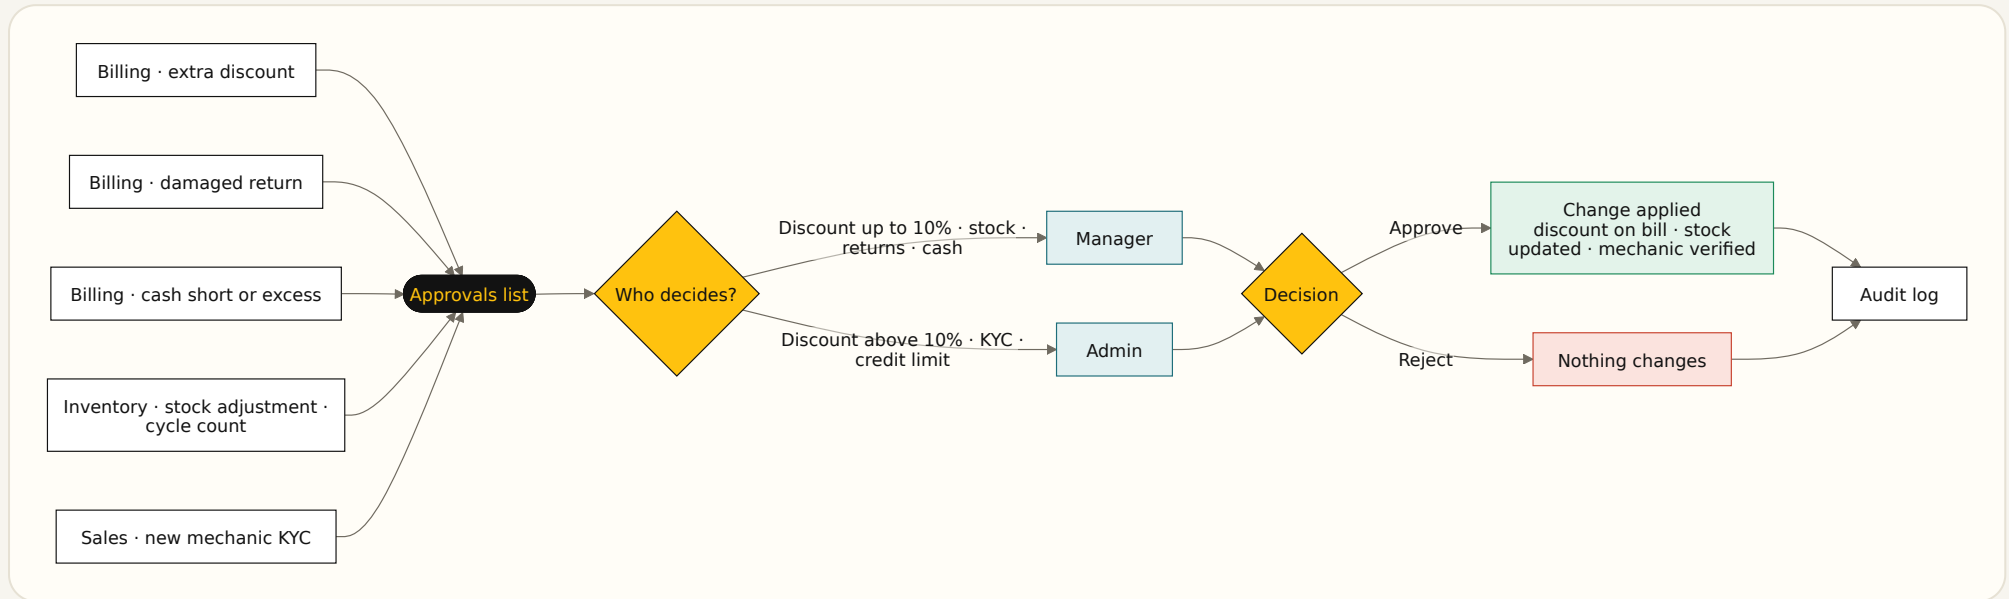

A part we don't have can still be ordered, from the app or at the counter, and tracked until it arrives.

Approvals

MANAGER & ADMIN

Requests from every role land in one Approvals list. Nothing changes until someone approves; every decision is written to the audit log.

Business rules behind the flows

No sale without a bill

Every part leaving the store is on an invoice.

Barcode only

Invoice items are added by scanning or typing the barcode.

Wallet $\neq$ credit

Wallet is rewards earned; credit is what a mechanic owes.

Overdue blocks credit

Any overdue invoice stops new credit until it is paid.

CX with Mech = customer price

The mechanic who brought the customer is noted on the bill.

Warranty from bill date

Days are set per product.

5 km verified mechanics

If none is near, show the Bike Pharma Bike Surgeon.

Staff logins from Admin

Only customers and mechanics can sign up.

Receive payment in one place

Only from Mechanic outstanding.

Insurance and PUC never lapse

Reminders go out before the expiry date.

People choose notifications

Customers and mechanics pick what they get; offers skip people who turned them off.

Discount limits

Billing 2% · Manager 10% · Admin above.
