

Bike Pharma App Guide

Sep 28, 2026 · @Sam Khazi

Overview

Bike Pharma is one app for the whole two-wheeler spares business: customers buy parts and book service, mechanics buy at mechanic price on wallet and credit, and five staff roles run billing, sales, stock, the branch and the company. The clickable prototype and the public website share the same black #121212 and yellow #FFC20E theme and the Bike Pharma logo.

Item	Where
App prototype (all 7 roles)	Bike Pharma app
Website	Bike Pharma website
Code	Repo samkhazi/bike-pharma-app, branch claude/new-session-atx1ja: prototype/index.html (app), website/index.html (site)

Demo logins. Every account uses OTP 123456. On the login page, tap a demo login to fill it.

Role	Login ID
Customer	8951860708
Mechanic	9008948080
Billing staff	samkhazi25@gmail.com
Sales Executive	samkhazi26@gmail.com
Manager	samkhazi27@gmail.com
Inventory staff	samkhazi28@gmail.com
Admin	boltech25@gmail.com

Login page. One field takes a mobile number (shown with +91, formatted as 98450 12345, tick when valid) or a staff email (tagged Staff login). The OTP goes by SMS or WhatsApp. The page has EN, KN and HI languages, Join as Customer and Join as Mechanic cards, and an animated hero. The OTP screen has a 30-second resend timer, a switch to the other channel, and locks for 15 minutes after 5 wrong tries.

Roles and access

Only customers and mechanics can sign up; every staff login is created by Admin, and each role sees only its own screens. A mechanic signup waits for Admin approval before the first login.

Role	How the login is made	Bottom navigation	Cannot see
Customer	Self signup with mobile + OTP	Home, Shop, Service, Orders, Account	Mechanic price, staff screens
Mechanic	Self signup, Admin approves (gets BP-MECH code)	Home, Shop, Wallet, Credit, Account	Customer price lists, staff screens
Billing staff	Created by Admin	Home, Invoice, Find Part, Search, Account	Salary, admin settings, price editing
Sales Executive	Created by Admin	Home, Order, Stock, Search, Account	Price editing, admin settings
Inventory staff	Created by Admin	Home, Stock in, Stock, Search, Account	Selling prices (enters MRP only), total stock value
Manager	Created by Admin	Home, Approvals, Team, Search, Account	Other branches, credit limit changes
Admin	Company owner	Overview, Users, Finance, Audit, More	Nothing hidden

- Staff IDs are made automatically: branch, role and number, for example BP-RNR-BIL-001.
- Admin can change a staff role or deactivate a login. A deactivated login sees "This login has been deactivated by Admin".
- Search is scoped by role: Billing sees customers, mechanics, invoices and parts; Inventory sees parts only; Admin sees everything.
- Every sensitive change (price, wallet, credit, role, settings, returns, security) is written to the audit log.

Customer app

The customer buys spares, books service and keeps every bill, warranty and document of their bike in one place. Demo customer: Anjali Rao, 8951860708.

Area	What the customer can do
Home	Greeting with wallet balance chip; QR scanner, notifications and cart in the header; bike card (Pulsar 150, 9,800 km, last serviced at 2,000 km, service due); Insurance/PUC alert; part-order tracker; quick tiles (Buy spares, Find mechanic, Book service, My orders, Offers, Warranty, Insurance & PUC, Wishlist)
Shop & product	Browse by category, product page with fitment, warranty and price; out-of-stock items show Order this part
Cart & checkout	Address, payment (UPI, card, net banking, COD), use wallet up to 20% of the bill, 2% cashback; success animation with confetti
Part orders	Order a part that is out of stock; track 5 steps (placed, ordered from supplier, received at store, ready or out for delivery, completed) with dates and advance paid
Book service	Pick services, date and time; Visit workshop or Pickup & drop (₹99). Pickup asks for location: GPS, saved address or typed address with pincode; drop can be a different place
Mechanic choice	Only Bike Pharma verified mechanics within 5 km, with address, distance from current location, minutes by bike, map and directions. None nearby → Bike Pharma Bike Surgeon workshop
My orders	Online orders, part orders and service bookings with tracking
Warranty	Every warranty from app and store bills, days left
Insurance & PUC	Status per bike, reminders 30/15/7/1 days before (WhatsApp + SMS), renew insurance from 3 quotes, renew PUC at store / with pickup / nearest centre, or update if renewed elsewhere
Account	Purchase history (online, store, service, part orders; by year; savings vs MRP; invoice; buy again), My wallet, vehicles, addresses, warranty, notification settings, language

Area	What the customer can do
Wallet	Balance, earned, used; 2% back on app orders, 1% on store bills, ₹100 per referral, ₹50 per service review; refer code
Notifications	Customer picks 10 types (orders, part orders, service, payments, warranty, insurance & PUC, service due, wallet, offers, new parts) and App / WhatsApp / SMS for each; payments are always on; quiet hours 10 PM to 8 AM

Mechanic app

The mechanic buys at mechanic price, earns wallet rewards and buys on 30-day credit, with the wallet and the credit kept as two separate ledgers. Demo mechanic: Ravi Kumar Auto Works, BP-MECH-1025, 9008948080.

Area	What the mechanic can do
Home	Wallet balance, outstanding, next due date, offers
Shop & product	Mechanic price with quantity tiers (10+ and 25+ cheaper), 3% wallet reward shown before buying, use wallet up to 10% of the bill, Pay now or Buy on credit
Wallet	Reward ledger: earned, used, balance, full history. Never changes the outstanding
Credit	Outstanding ledger: credit purchases, payments, overdue, next due; Pay outstanding
Credit block	If any invoice is overdue, Buy on credit is locked until the overdue amount is paid (Admin can also block when over the credit limit)
Purchase history & invoices	Every purchase with paid, part paid or pending status
Rewards & account	Tier (Verified, Bronze, Silver, Gold) and progress to the next tier, unique mechanic code, offers, notification settings

Area	What the mechanic can do
Notifications	9 types (orders, payment due, credit status, wallet, price changes, bulk offers, back in stock, customer bookings, part orders); payment due and credit status are always on

Signup. The mechanic enters name, workshop name and area. The account stays pending until Admin approves it; approval creates the BP-MECH code.

Billing staff

Billing makes every sale: nothing leaves the store without a bill, and the bill starts warranties, cuts stock and updates the customer or mechanic account. Demo: Priya Shetty, samkhazi25@gmail.com.

Making an invoice

1. Add items only by barcode: scan, or type the 13-digit number. Out-of-stock items and quantities above stock are blocked.
2. Choose the party:
 - **Customer** — customer price; mobile number links the bill and warranty to their app.
 - **CX with Mech** — a mechanic brought the customer; customer price applies and the mechanic is recorded as referrer.
 - **Mechanic** — pick the mechanic; mechanic price; Credit allowed unless blocked for overdue.
 - **Walk-in** — no mobile; warranty is printed on the bill only.
3. Optionally pay part of the bill from the customer wallet (up to 20%) or mechanic wallet (up to 10%).
4. Choose Cash, UPI, Credit (mechanic only) or Split and generate. Warranties start automatically, stock is reduced, cashback is added, and the tax invoice opens.

Screen	What it does
Home tiles	Today's sales, Pending payments, Cash collected, UPI collected — each opens its list; Recent bills open the bill
Mechanic outstanding	Total across all mechanics, per mechanic and per invoice, overdue and credit-blocked tags; Receive payment is only here

Screen	What it does
Receive payment	Pick mechanic, amount, Cash/UPI/Bank/Cheque; settles oldest invoices first; wallet untouched
Find Part	Part name, brand, model, BS norm, colour, CC → in-stock parts with rack number and MRP; tolerant to spelling (break pad → brake pad); out of stock → Take order for customer
Part orders	Create an order for an out-of-stock part (qty, advance, pickup or delivery) and move it through the 5 steps; the customer sees each step
Scan to find, Warranty Check, Price list	Look up a part by barcode, check any warranty, view prices (read only)
Tax invoice	A4/PDF and 80 mm thermal layouts: GSTIN, HSN, CGST + SGST, wallet used, amount in words, PAID stamp or UPI QR for credit, warranty table; Share, PDF, Print

Sales Executive

The Sales Executive works in the field: visits mechanics and customers, makes quotations and orders, and handles follow-up tasks from the Manager. Demo: Arjun Nayak, samkhazi26@gmail.com.

Area	What it does
Home	Monthly target and progress (demo ₹7.5 L of ₹10 L), today's sales, visits, new customers and new mechanics
Tasks from Manager	Follow-up tasks (call a mechanic who stopped buying, welcome a first-time buyer) with Call and Mark done
Quick actions	Register customer, register mechanic, product search, create order, check stock, quotation
Order / quotation	Pick the party, add items at their price, send a quote or create the order
Stock	Stock list with rack locations (read only)

Area	What it does
Today's follow-ups	Planned calls with time and reason

Inventory staff

Inventory adds products, receives stock against supplier bills and keeps every part on a known rack. Stock only goes out through a bill; other movements need Manager approval. Demo: Mohammed Irfan, samkhazi28@gmail.com.

Area	What it does
Home tiles	Low stock, Out of stock, Today's entries, Pending GRN — each opens its list
Tasks from Manager	e.g. Prepare purchase order for the clutch cable; Prepare order opens a draft PO and marks the task done
Add product	3–4 photos, name, brand, category, part type (OEM, OES, Genuine, Aftermarket + packed-under brand), part number, barcode, fitment (bike brand, model, BS7/BS6/BS4/BS3, colour, or universal), MRP, warranty days, opening stock, reorder level, rack. Selling prices are set by Admin
Stock in (GRN)	Supplier, supplier bill number and amount, items by scan, save draft or post; posting adds stock
Stock	One list with stock and rack (Rack-Shelf-Bin, e.g. A-3-12); search by name, part number, barcode or rack; tap to move a part to another rack
Stock movements	Transfer, stock count, damaged, returned, adjustment — each goes to the Manager for approval
Part orders	Same list as Billing; mark received when the part arrives
Scan to find, Warranty Check	Barcode lookup and warranty lookup

Manager

The Manager runs one branch (Rajajinagar): tracks Admin's targets, keeps fast-moving stock in, and watches every mechanic's business and payments. Demo: Kavya Hegde, samkhazi27@gmail.com.

Area	What it shows or does
Home switches	Today / This month changes every number; branch sheet (own branch only, others locked)
Tiles	Sales (by payment mode, party type, category, staff), Gross margin (by category), Outstanding, Pending approvals
Targets from Admin	Sales, collection, margin, new mechanics, verified mechanics, new customers; % done, where you should be today, amount needed per day, past 3 months
Stock alerts	Fast moving (40+ sold in 30 days), Not selling (60+ days), Out of stock, Below minimum; suggested order quantity; select parts → Prepare order (PO to supplier) or Assign task
Orders & tasks	Purchase orders (Draft, Sent, Received) and tasks (Open, Done)
Our Mechanics	Every mechanic grouped by Status (Top performers, Regular, Needs attention, Credit blocked, Not buying, New), Tier, Bike brand or Area
Verified mechanics	Tier, verified since, credit used vs limit, near/over limit; unverified list with reason and Ask Admin to verify
Mechanic business	Daily, weekly, monthly vs the previous period (same days); who gave less business and by how much; regular items missed
Mechanic profile	From Search: contact, grade, 6-month trend, items bought most, brand share, categories, credit, payment path, purchase history, workshop details

Area	What it shows or does
Report cards	Score out of 100 from business, growth, payments, regular buying and loyalty (20 each); grade A+ to D, New for first-month mechanics; what to do next
Mechanics not buying / First-time buyers	Lists with Call and Assign follow-up
Approvals, Team	Approve or reject stock adjustments, returns, extra discounts; staff attendance

Admin

Admin sees all three branches, has every Manager tool, and is the only role that sets prices, targets, business rules, staff logins and mechanic credit limits. Demo: Rahul Menon, boltech25@gmail.com.

Overview, top to bottom: branch switch (All, Rajajinagar, Malleshwaram, Yeshwanthpur) → total sales → Rajajinagar targets → purchases, gross profit, outstanding, stock value → customers, mechanics, staff → Mechanics section → Stock & operations section → orders, returns, warranty claims, security alerts → Admin tools → daily sales chart.

Tool	What Admin can do
Master pricing	Set MRP, customer price and mechanic price per part (customer ≤ MRP, mechanic ≤ customer); new products from Inventory show Needs price
Business settings	Cashback on app and store bills, wallet limits for customers and mechanics, referral bonus, credit period, block credit when over limit, verified-mechanic radius, Bike Surgeon address and timings, shop name, GSTIN, phone and UPI used on invoices
Branch targets	Set the six monthly targets the Manager tracks
Staff	Create staff logins (ID made automatically), change role, deactivate or re-activate
Mechanics	Approve new mechanics; set tier (Gold, Silver, Bronze, Not verified) and credit limit from the mechanic profile; adjust wallet

Tool	What Admin can do
Send offer / message	Pick a group (all customers, Insurance/PUC expiring, no purchase in 90 days, all mechanics, Gold & Silver, not buying), a message and channels; people who turned off offers are skipped
Returns	Approve (stock back + refund) or reject
Security alerts	Wrong OTP attempts and new-device logins; mark safe, block 24 h or log out the device
Finance, Audit, Roles & access	P&L, receivables, reports; full audit log; role permission matrix

Business rules

Wallet and credit are two separate ledgers: wallet is rewards the customer or mechanic can spend, credit is money a mechanic owes, and no wallet entry ever changes the outstanding. The defaults below can be changed by Admin in Business settings unless marked fixed.

Rule	Default	Changed by
Nothing is sold without a bill	Fixed	—
Customer cashback on app orders	2%	Admin
Customer cashback on store bills (with mobile)	1%	Admin
Mechanic wallet reward per purchase	3%	Fixed in prototype
Customer can pay from wallet	Up to 20% of the bill	Admin
Mechanic can pay from wallet	Up to 10% of the bill	Admin
Referral bonus	₹100	Admin
Mechanic credit period	30 days	Admin
Block new credit when any invoice is overdue	Always on	Fixed
Block new credit when outstanding is over the limit	Off	Admin

Rule	Default	Changed by
Payments settle	Oldest invoice first	Fixed
Warranty	Days set per product at Add product; starts on the bill date automatically	Inventory / Admin
Prices	MRP from pack by Inventory; customer and mechanic price by Admin only	Admin
CX with Mech bill	Customer price; mechanic recorded as referrer	Fixed
Verified mechanics shown to customers	Within 5 km, else Bike Surgeon	Admin
OTP	Demo 123456; 30 s resend; 15-minute lock after 5 wrong tries	Fixed
Returns	Within 7 days with bill and original pack	Admin approves
GST on invoice	18% inclusive, split CGST 9% + SGST 9%	Fixed

Website

The website brings the same features to desktop and mobile browsers, with the app's theme, logo animation and a login button that opens the app.

Section	What visitors can do
Hero + fitment check	Enter part name, bike brand, model and BS norm; see only parts that fit, with stock and price; add to cart
Brands strip	Moving strip of stocked brands
Shop	12 categories and best sellers with MRP, discount, fitment and warranty; cart drawer with savings, delivery and 2% cashback; place order
Book a service	Pick services and date, enter pincode; nearby verified mechanics on a map with distance, or Bike Surgeon when none is within 5 km; confirm booking

Section	What visitors can do
Track & protect	Warranty check by mobile, part-order tracking by number (SO-1001), Insurance & PUC reminder signup
For mechanics	Tiers, benefits and a Join as mechanic application
Stores	Three branches with timings and directions
App section	Phone preview, QR code and Open the app

Animation: logo gear, piston and shine; moving road with a rider; counting stats; sections rising on scroll; tilting product cards; items flying into the cart; confetti on orders, bookings and applications. Reduced motion is respected.

Demo data and next steps

The prototype runs fully in the browser: changes are saved on that device only, and Account → Reset demo data brings everything back to the start.

Demo data to replace with real data

- 8 products, 3 app mechanics plus 5 report-only mechanics, and sample bills, part orders, POs and tasks.
- Other-branch numbers, month-level sales and margin, past purchase and payment history, and item buying cycles.
- Shop GSTIN, address, phone, UPI ID and Bike Surgeon details (editable in Business settings).
- Insurance quotes, security alerts and returns.

Needed for the real app

- ☐ Backend and database for users, products, stock, bills, ledgers and audit log
- ☐ OTP by SMS and WhatsApp through a provider
- ☐ Payment gateway (UPI, cards) and UPI QR on invoices
- ☐ Thermal printer connection (58 or 80 mm) and PDF invoices
- ☐ Maps and GPS for distances, pickup and directions
- ☐ Insurance partner integration and PUC centre list
- ☐ Barcode scanning with the phone camera and a barcode gun
- ☐ Reports computed from real bills instead of demo figures

Open questions

- Thermal printer size: 58 mm or 80 mm.
- Next service by kilometres or by date (the demo bike shows 9,800 km with the last service at 2,000 km).
- Staff targets for Billing and Sales Executive.
- Report card weights (each part is 20 points today).
